

Application S/N 09/787328
Amendment and Response dated October 26, 2004
Response to Office Action dated July 26, 2004

Amendments to the Abstract:

Please amend the abstract as follows:

The invention provides a cDNA sequence of a new type II human hepatoma derived growth factor (HDGF2). The protein encoded by such sequence is a homology of type I HDGF. The present invention also relates to peptides encoded by the nucleotide sequences, to uses of these polynucleotides and the polypeptides, and methods for producing the said polynucleotides and the polypeptides.
